The method according to claim 29, wherein the fastening part includes first and second screws passing through first and second holes at a same side edge of at least one of the first and second frames.—

--58. The method according to claim 29, wherein the fastening part includes an adhesive material.--

The method according to claim 29, wherein the liquid crystal display device is immovable within the housing and the fastening part includes a screw passing through at least one hole in at least one of the first and second frames.--

The method according to claim 54, wherein the fastening part includes a second screw passing through a second hole in at least one of the first and second frames at a same side.--

The method according to claim 33, wherein the liquid crystal device is immovable within the housing.--

The method according to claim 56, wherein the fastening part includes a screw passing through at least one hole. --

The method according to claim 33, wherein the fastening part includes first and second screws passing through first and second holes at a same side edge of the frame.--

The method according to claim 33, wherein the fastening part includes an adhesive material.--

--60. The method according to claim 35, wherein the liquid crystal display device is immovable within the housing and the fastening part includes a screw passing through at least one hole in the frame.--

26

74338.1 8733D6658 12/22/1998 The method according to claim 69, wherein the fastening part includes a second screw passing through a second hole in the frame at a same side.--

The method according to claim 37, wherein the liquid crystal display device is immovable within the housing.--

The method according to claim 62, wherein the fastening part includes a screw passing through at least one hole. --

The method according to claim 37, wherein the fastening part includes first and second screws passing through first and second holes at a same side edge of at least one of the first and second frames.--

The method according to claim 37, wherein the fastening part includes an adhesive material.--

The method according to claim 37, wherein the liquid crystal display device is immovable within the housing and the fastening part includes a screw passing through at least one hole in at least one of the first and second frames.—

The method according to claim 66, wherein the fastening part includes a second screw passing through a second hole in the at least one of the first and second frames at a same side.--

--68. The method according to claim 41 wherein the liquid crystal display device is immovable within the cover.--

769. The method according to claim 68, wherein the fastening part includes a screw passing through at least one hole. --

E!

74338.1 8733D6658 12/22/1998 The method according to claim 41, wherein the fastening part includes first and second screws passing through first and second holes at a same side edge of at least one of the first and second frames.--

The method according to claim 41, wherein the fastening part includes an adhesive material.--

The method according to claim 11, wherein the liquid crystal display device is immovable within the cover and the fastening part includes a screw passing through at least one hole in at least one of the first and second frames.—

The method according to claim 72, wherein the fastening part includes a second screw passing through a second hole in the at least one of the first and second frames at a same side.--

The method according to claim 44, wherein the liquid crystal display device is immovable within the cover.

The method according to claim 74, wherein the fastening part includes a screw passing through at least one hole. --

The method according to claim 44, wherein the fastening part includes first and second screws passing through first and second holes at a same side edge of at least one of the first and second frames.—

The method according to claim 44, wherein the fastening part includes an adhesive material.
